

Caretaker Report 7-30-2022

- The tractor has a coolant leak and hoses are needed to repair. They have been ordered.
- There is a missing step on the pool ladder and parts have been ordered to replace.
- Stoney replaced a rotted board on the stairs to the captain's office, installed a solar streetlamp at the triangle next to A Building, started the repairs to J8 ceiling, and replaced spindles at J7. The lattice repair at D10 will wait until owners give access to the crib.
- The burn pile was burned this week to make room for all the trimming that Stoney is doing.
- There is a captain from the Palm Island Ferry that is looking for some night work. He will be interviewed this week.
- The skiff is having a difficult time starting
- The treatment plant leaked some content from the manhole behind Building A. NES was contacted and a pump was put into the lift station. It appears the control panel failed. Jim from NES came to LGI on Sunday and will be consulting with the panel manufacturer.
