

## Caretakers Report Week of December 18th, 2022

### Hideaway Bay Beach Club

It was another successful week at Hideaway Bay. Novak Environmental was here on Monday Dec 19th to prep the sewer plant for pump out. Martin Septic was onsite Monday, Tuesday, and Friday and with my assistance was able to get our septic system pumped out. Total Control was here and treated all the building interiors for termites. With the drywall removed Dell thinks this interior spray will help significantly with the termite problems on the property.

Work continues with general cleanup and upkeep of the property and barge landing. More bags of rip rap were delivered by Robert and will be installed this upcoming week. The captains have plans to strengthen the timbers and pilings as well.

ADU left the island on Thursday for a Christmas break. They were able to get the debris out of the West pond! They also continue to bag trash and stage it near the barge landing.

Another busy week is ahead with Total Control arriving on Monday to begin termite tenting of A and E buildings.
