

Hideaway Bay Beach Club

Weekly Caretaker Report

Week of April 16th 2023

Another week of Maintenance work has passed at Hideaway Bay. FEMA continues to remove debris from the island including another pass-through Hideaway. All the vegetation from my tree and bush trimmings has been removed again as well as some more debris. They are doing a great job on the island!

My week was spent mainly on landscaping and trimming. The entire property was weed whacked, and the grass was cut. Cleanup was done to remove small debris leftover from the FEMA cleanup. The heavy equipment on the property also left the cart paths torn up again so grading was done on the road's multiple times. I was able to get 2 by 4 lumber transported to the island to rebuild the lids on the trash receptacles which will resume next week. Work was done to replace the pool chemical dosing hoses. The front tractor tires were replaced. All the holes in the garage were closed up with foam while the drywall is removed as well.

Joe Holmes and Clay were on the island working to restore the internet and they report things are going well.

The Captains have been busy helping with the landscaping projects, doing maintenance projects on the skiff as well as their usual duties.

Thank You,

Steve Lohr
