As you may have seen on social media, trusses for HBBC have begun to arrive on the island. Although the trusses are arriving, the Charlotte County Building Department is still inundated and running way behind in issuing permits. Until truss and framing permits are issued, no work may begin on the roofs of buildings D, E, J, and I. Unfortunately, we have no idea when those permits will be issued, but ADU continues to check with the county daily for any progress. We're all frustrated, but we ask you to be patient. ADU is doing their best to wade through the red tape and make things happen as quickly as possible.
